- Chapters include: Introduction; Analysis, Vision and Goals; and Action-Implementation
- Worked with diverse group of representatives across the County
- Identification of eligible public works projects, with complete cost estimates

## Comprehensive Economic Development Strategy

In the spring of 2001, Reveille assisted WSOS Community Action Commission and the Sandusky County Board of County Commissioners in preparing a CEDS for their primarily rural county.

With Sandusky County's (2000 Population: 61,792) population almost evenly divided amongst the rural townships and municipalities, the task at hand—to create an economic development strategy “agreeable” to all involved parties- required the utmost sensitivity towards understanding the various perceptions that these unique parties had concerning development.

The CEDS culminated in the identification of the most promising economic development priorities and projects to be pursued over the next five years in Sandusky County.
